

Endocrine System

刘佳梅

compose:

endocrine organ:

thyroid gland, parathyroid gland

adrenal gland, hypophysis

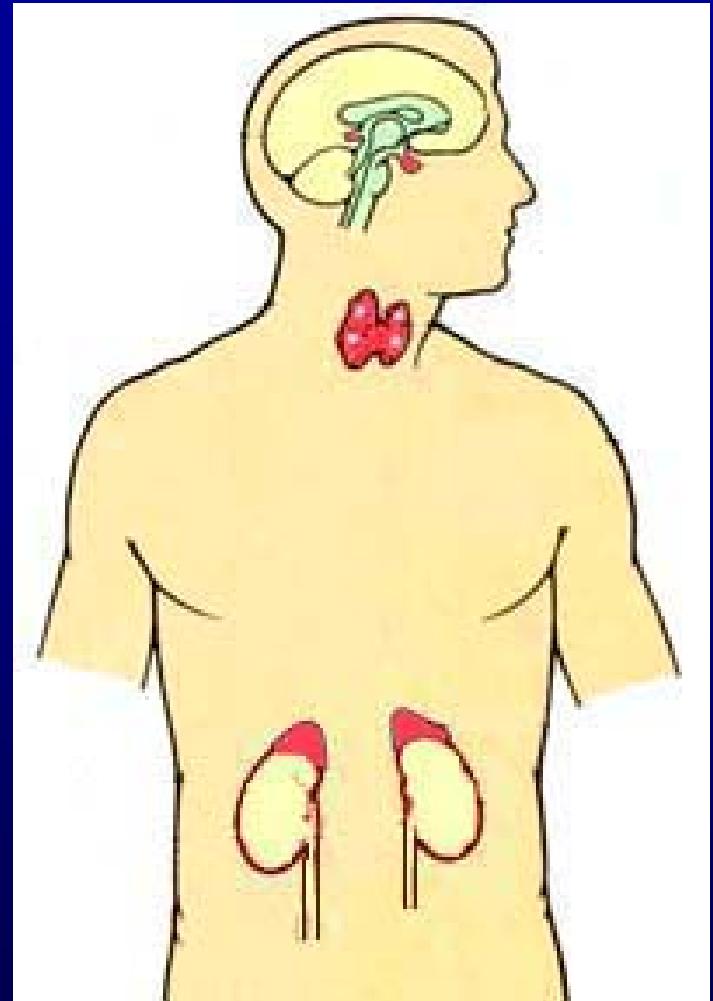

pineal body

endocrine tissue

endocrine cell : hormone

Protein secreting cell

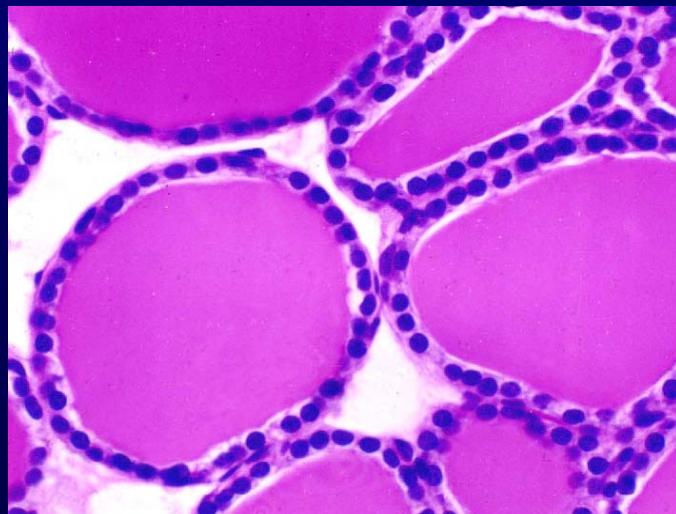

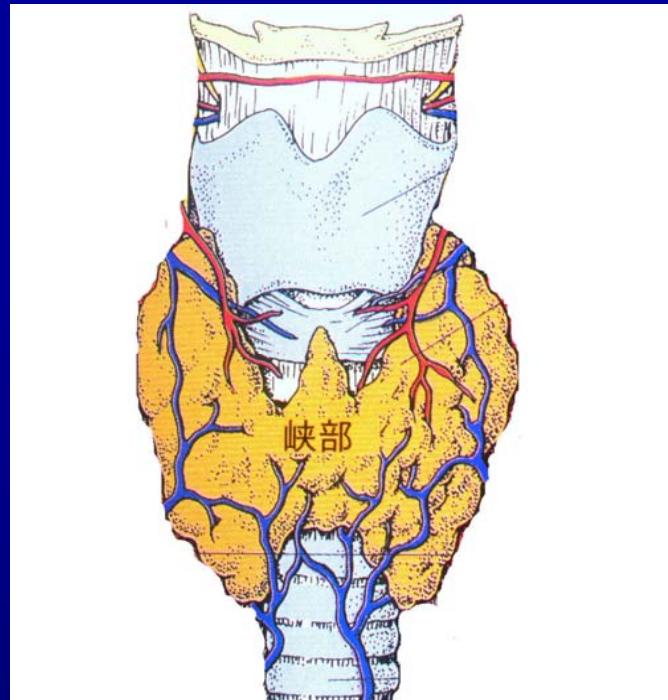

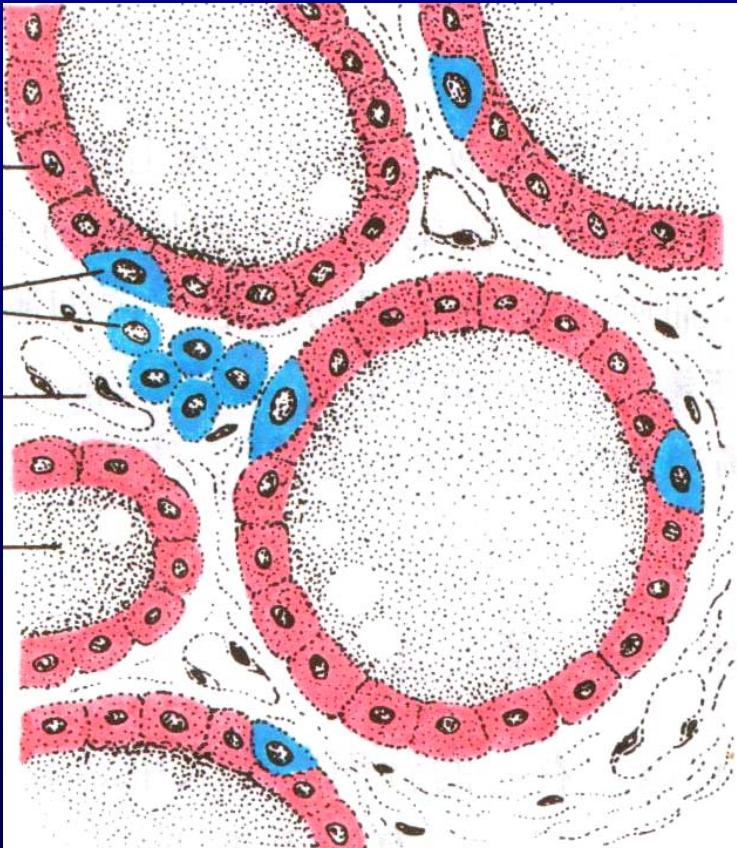

Steroid secreting cell

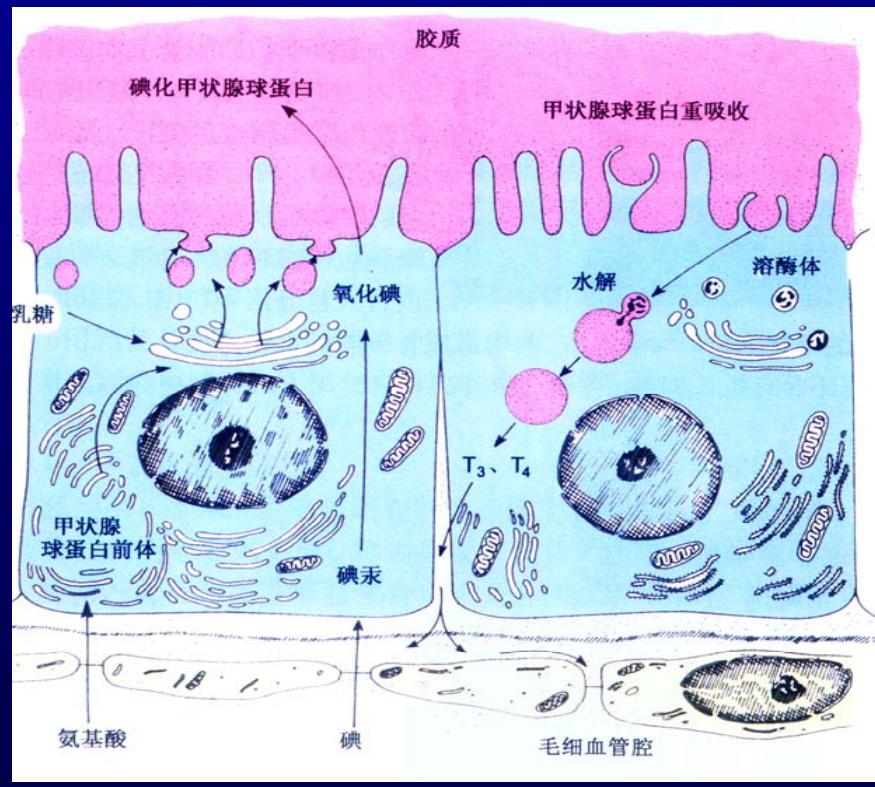

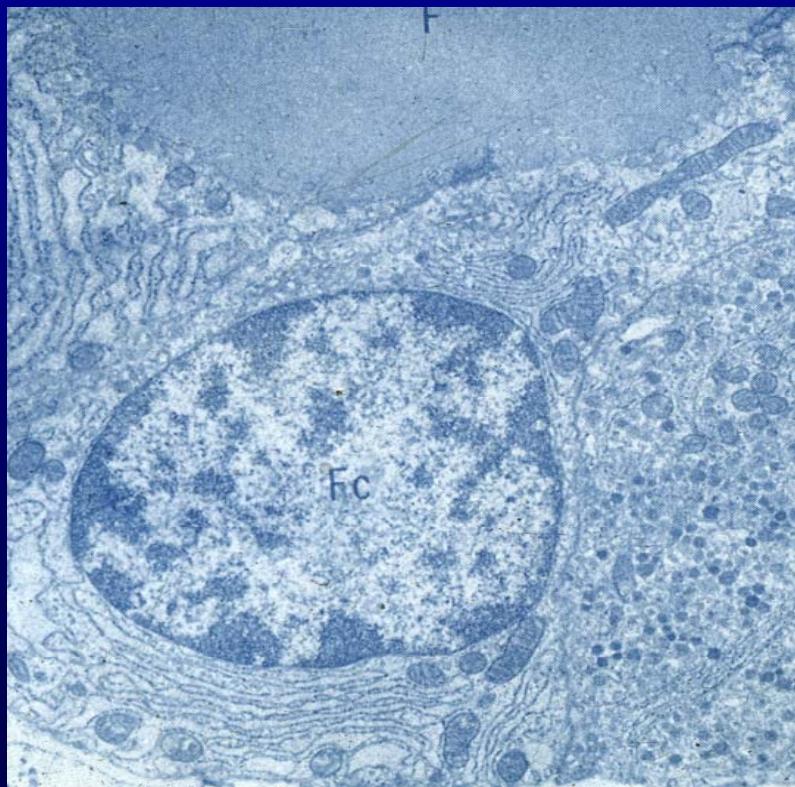

I thyroid gland

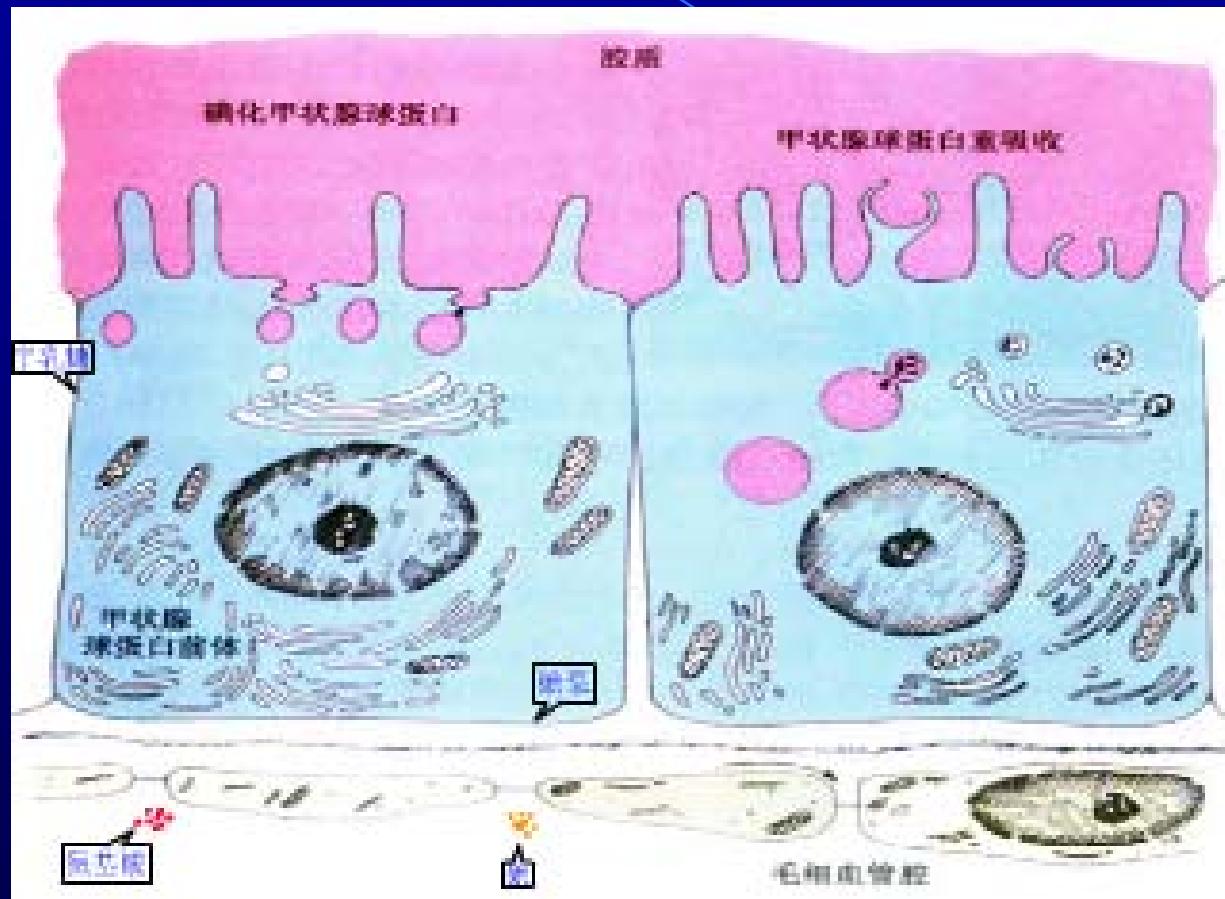

1. follicle

follicular epithelial cells
colloid: thyroglobulin

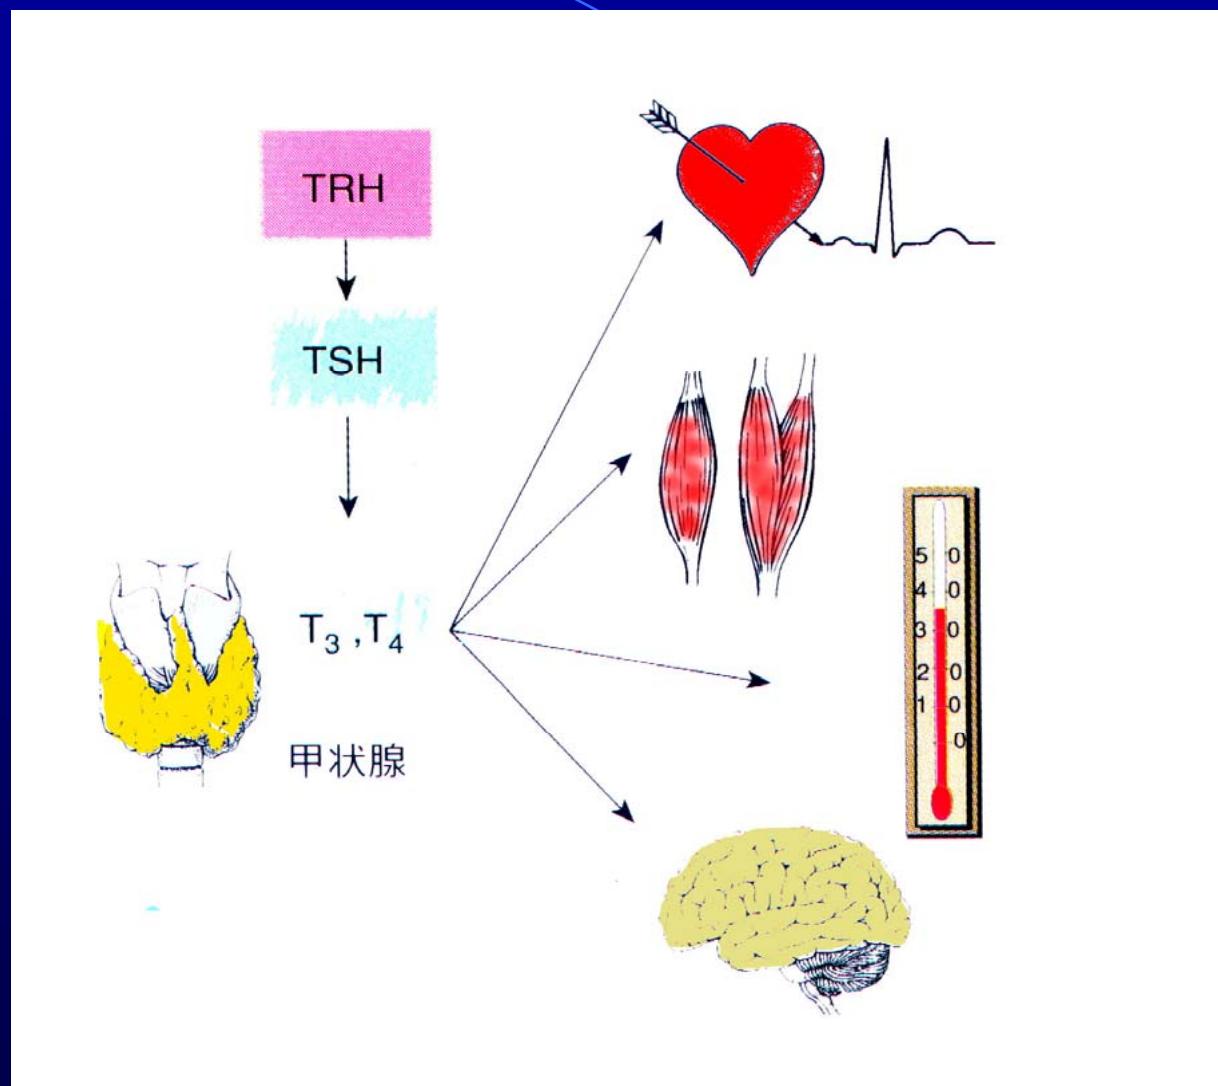

process of synthesis and secretion thyroxine of follicular epithelial cells:

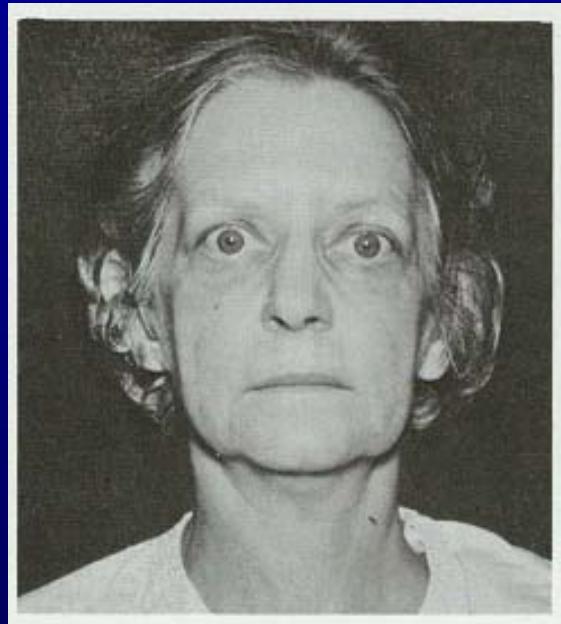

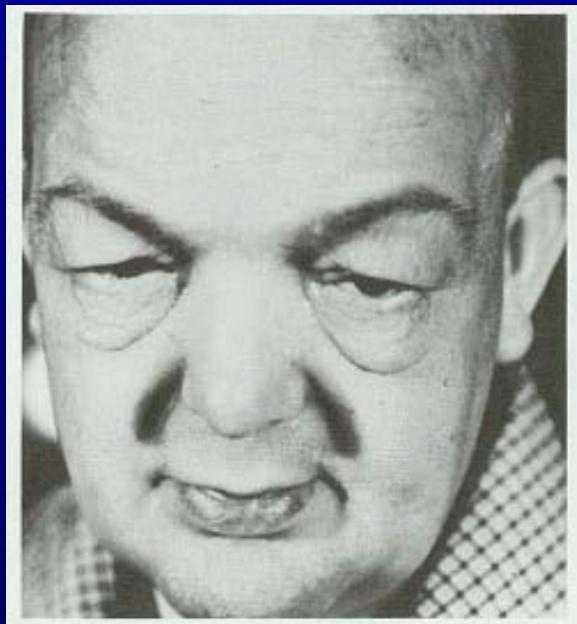

function of thyroid

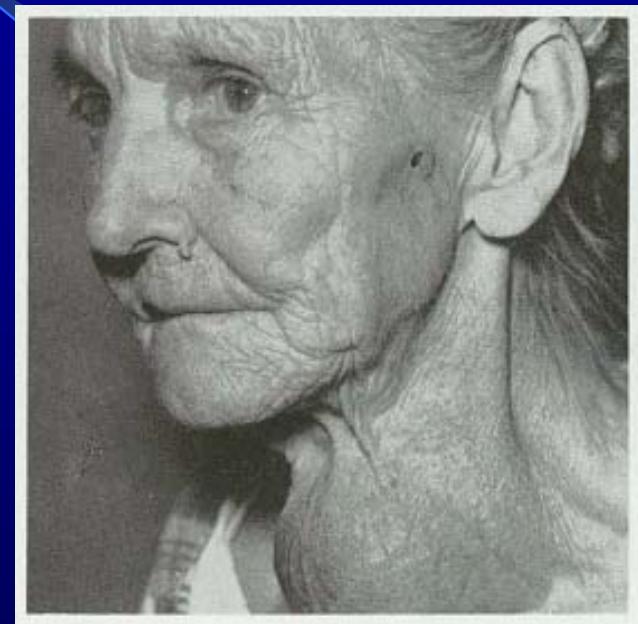

甲状腺素引起的临床疾病

甲亢

甲低

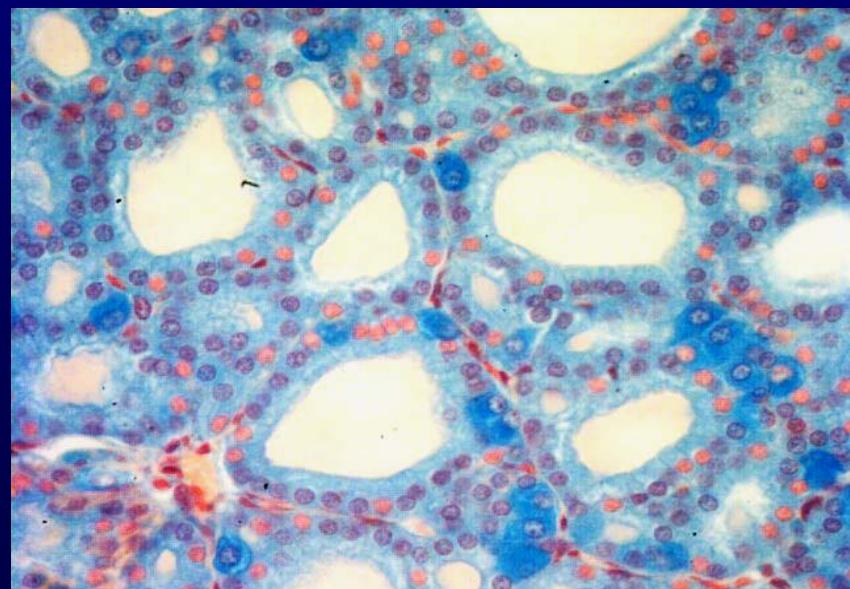

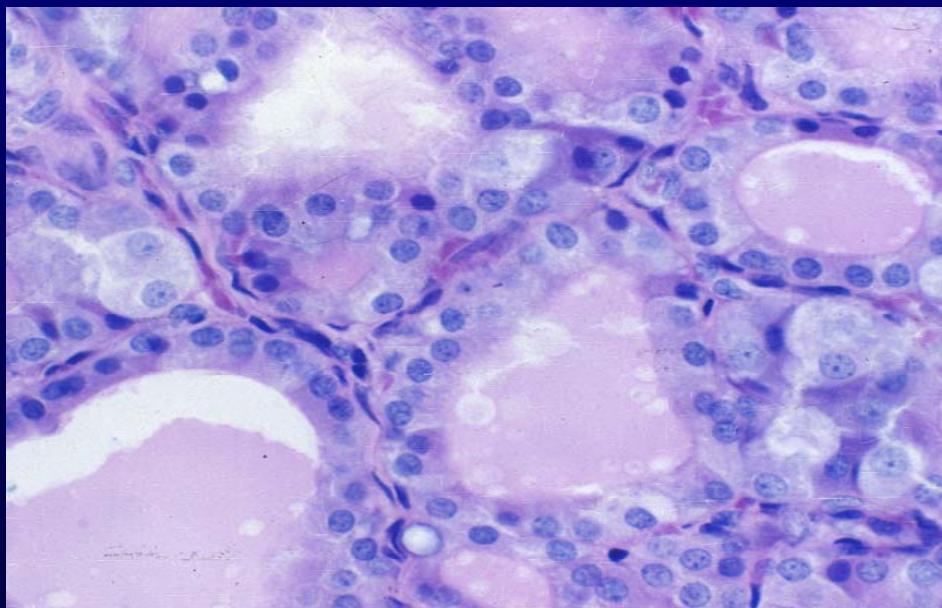

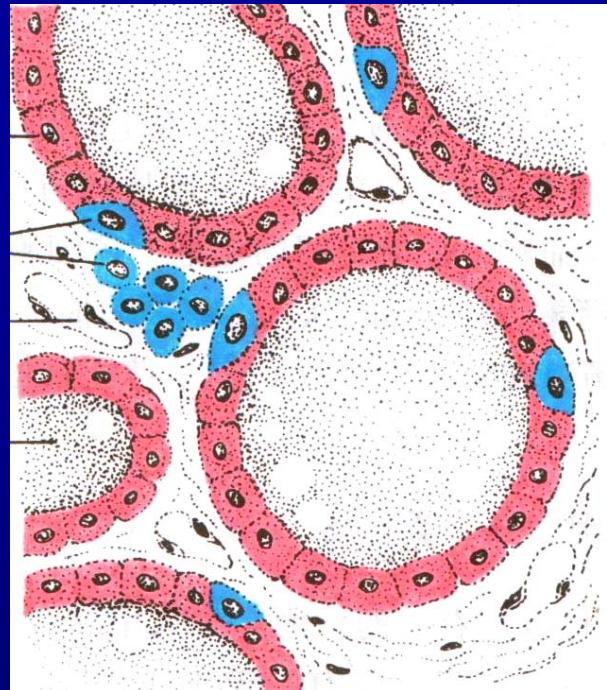

甲状腺肿大

2 parafollicular cell

LM: large , pale staining

EM: protein- secreting cells

function: secreting calcitonin

II parathyroid gland

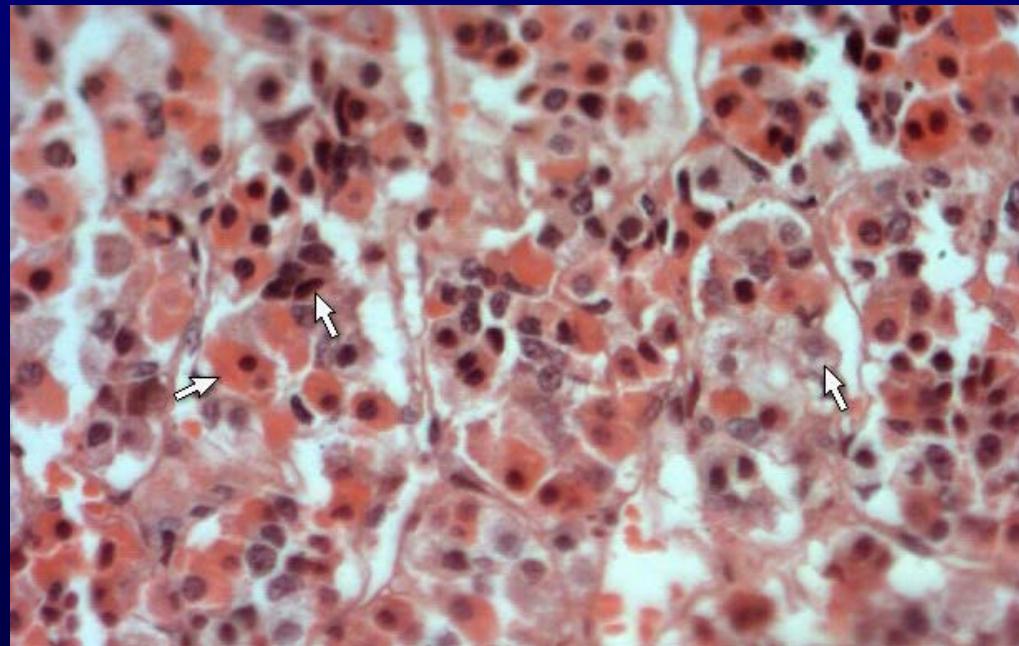

capsule

1.chief cell

LM: round, pale staining, slightly acidophilic

function: secreting parathyroid hormone , PTH

2.acidophilic cell

III adrenal gland

capsule

1. Adrenal cortex

1.1 zona glomerulosa

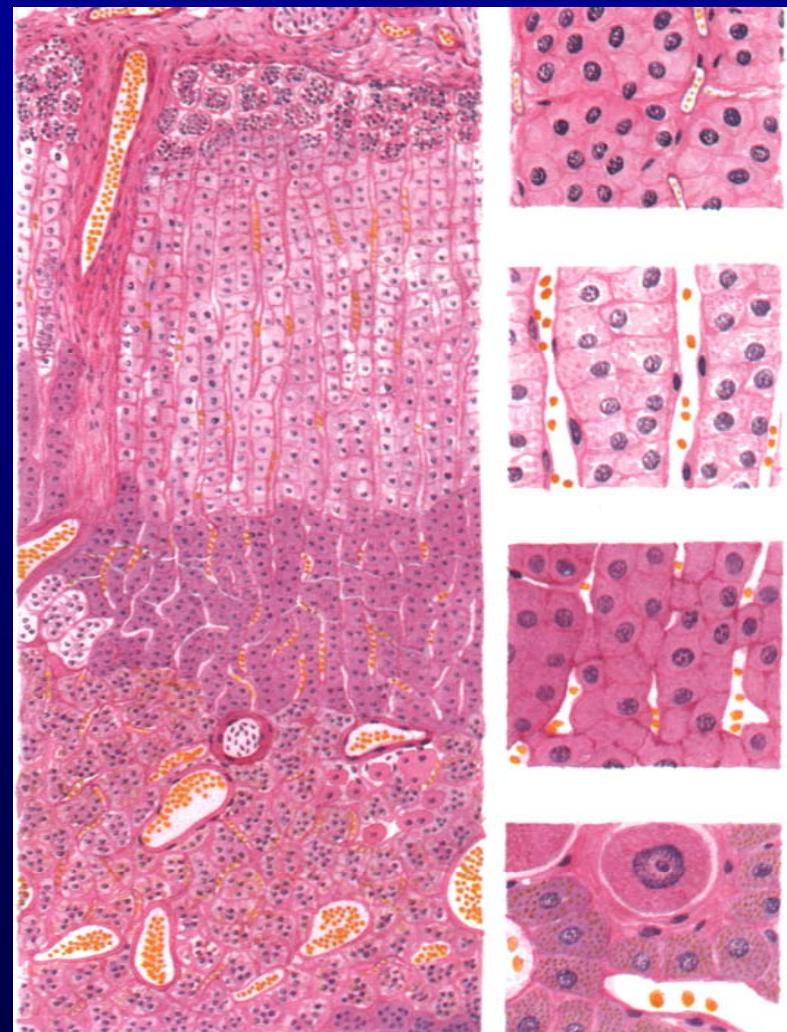

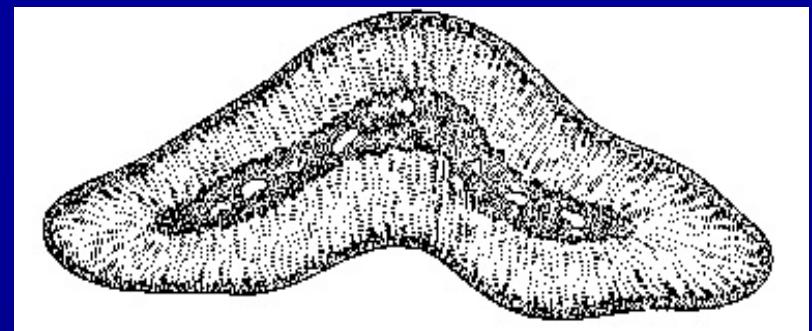

mineralocorticoid: aldosterone

1.2 zona fasiculata

glucocorticoid

1.3 zona reticularis

androgen, small amount of
glucocorticoid, estrogen

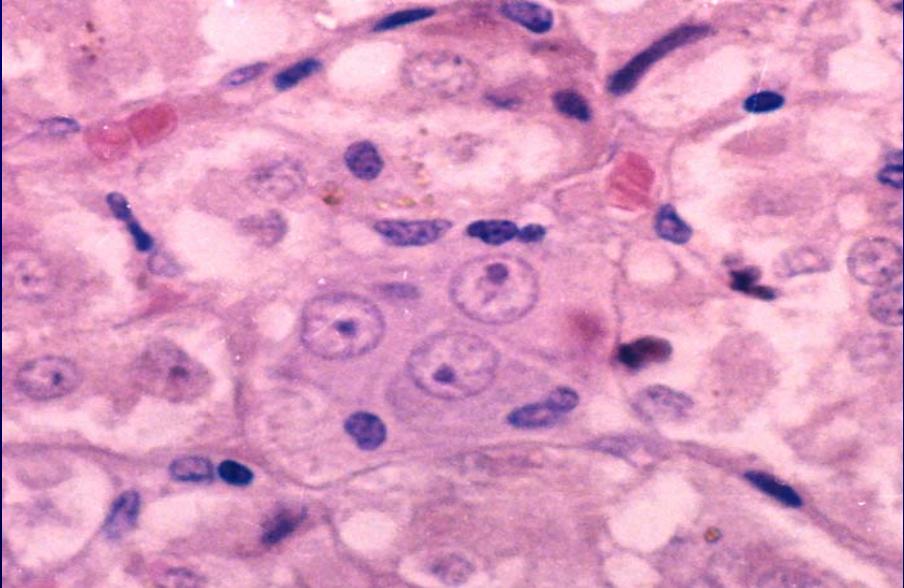

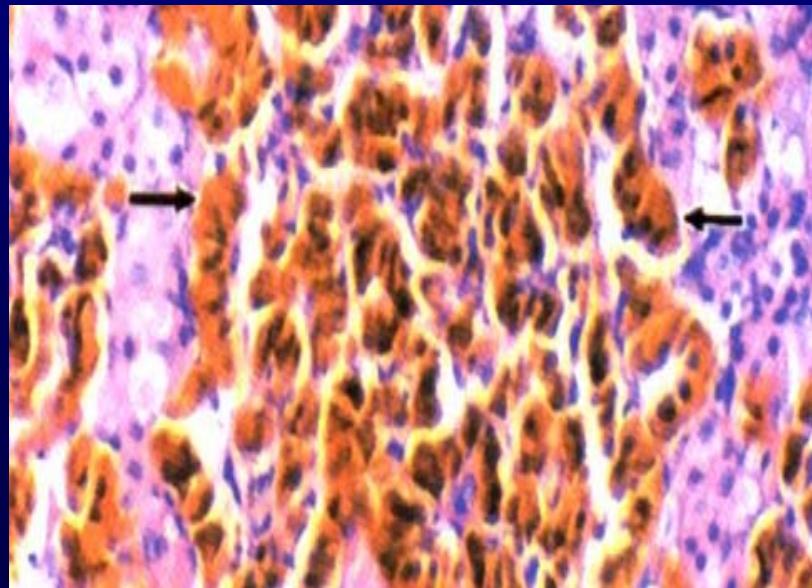

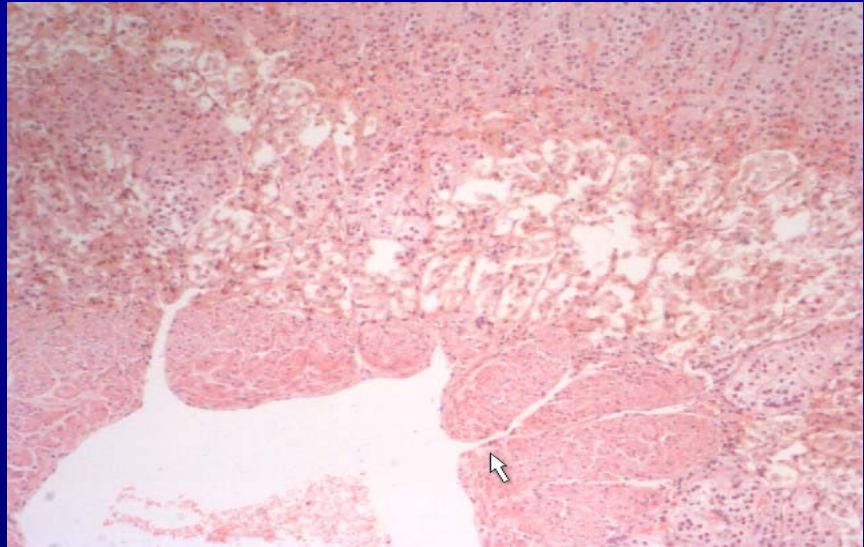

2.medulla

chromaffin cells

Centre vein

sympathetic ganglion cell

IV hypophysis

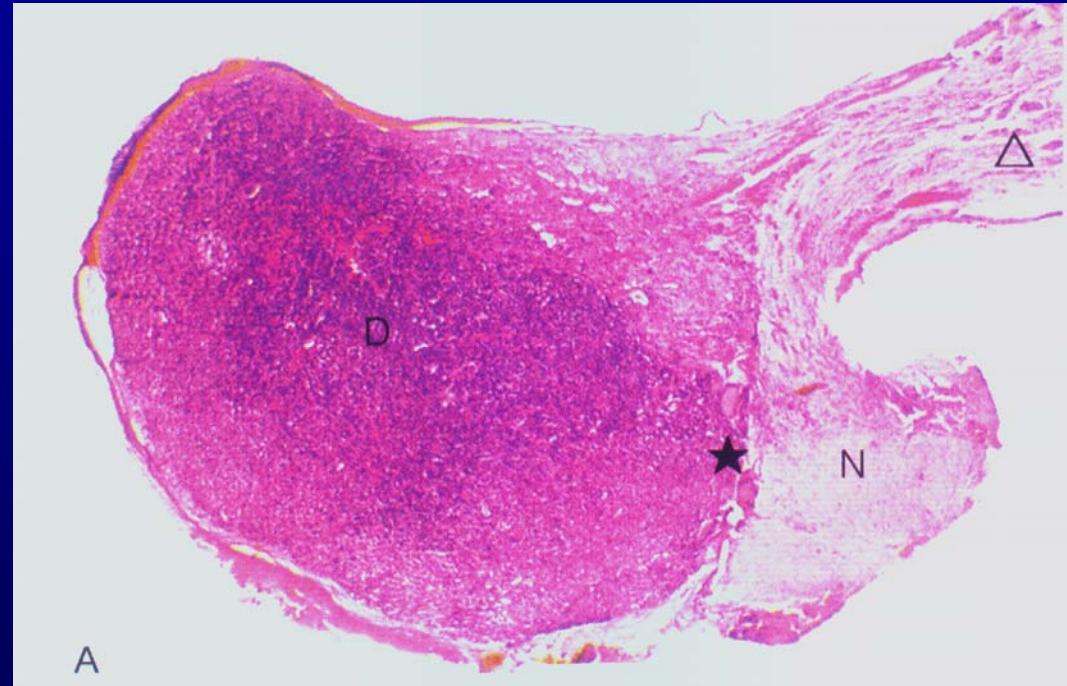

adenohypophysis

pars distalis

pars intermedia

pars tuberalis

neurohypophysis

1 adenohypophysis

1.1 pars distalis

(1) acidophilic cell

- 1) somatotroph : growth hormone , GH
- 2) mammotroph : prolactin , PRL

(2) basophilic cell

- 1) **thyrotroph:** thyroid stimulating hormone,TSH
- 2) **gonadotroph :**
follicle stimulating hormone ,FSH
luteinizing hormone, LH
interstitial cell stimulating hormone , ICSH

3) **corticotroph**

- adenocorticotrophic , ACTH
lipotrophic hormone , LPH

(3) chromophobe cell

巨人症

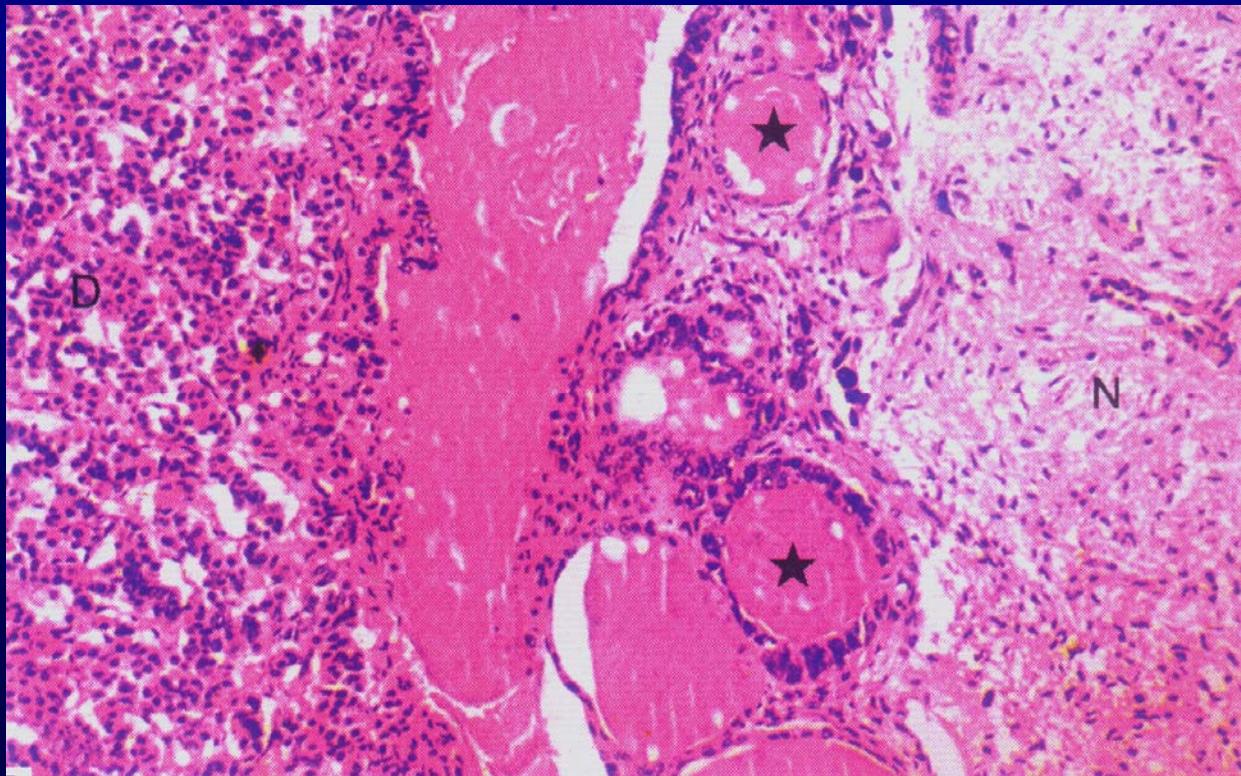

侏儒症

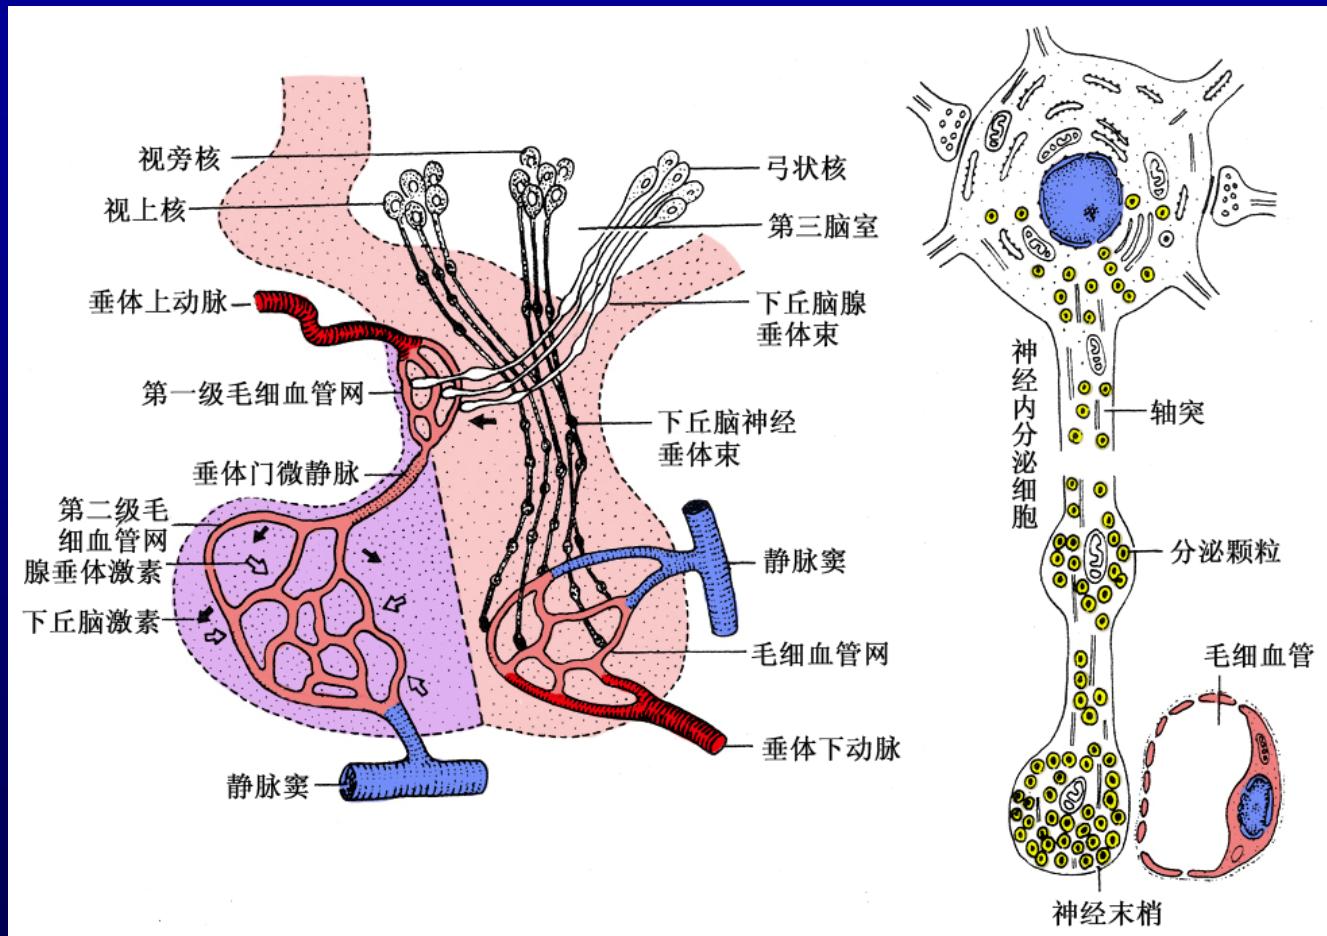

1.2 pars intermedia

follicles , chromophobe cells, basophilic cells,
producing melanocyte stimulating hormone,
MSH

1.3 pars tuberalis

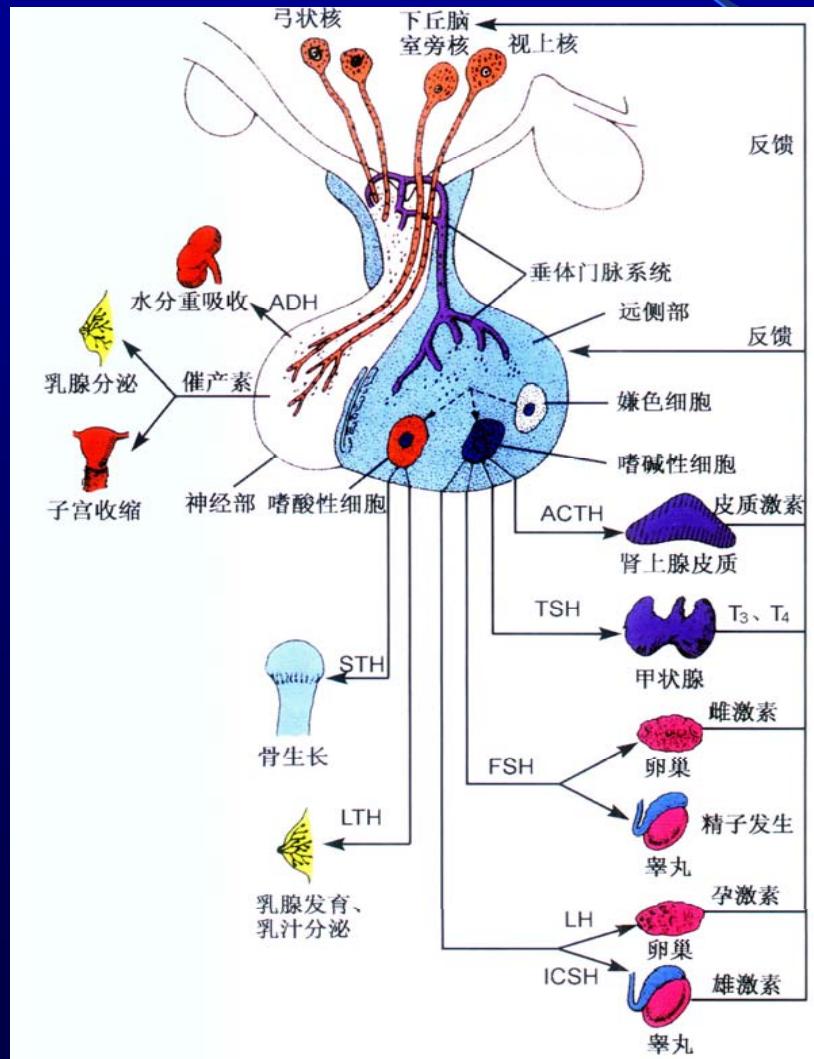

1.4 hypophyseal portal system

1.5 relationship of hypothalamus and adenohypophysis

release hormone, RH

release inhibiting hormone, RIH

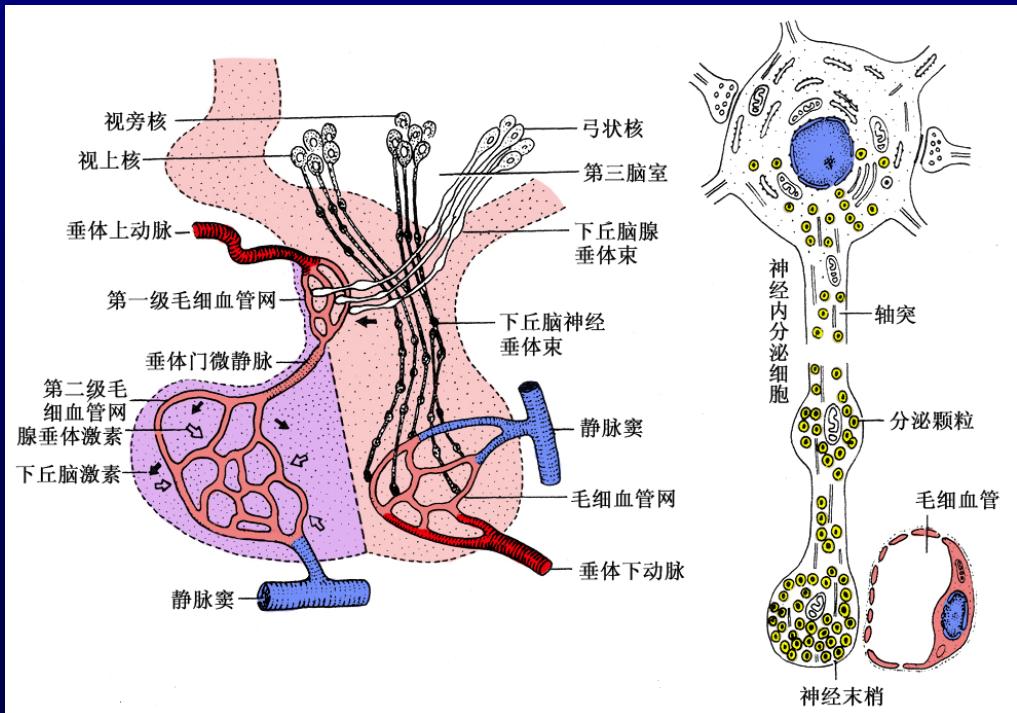

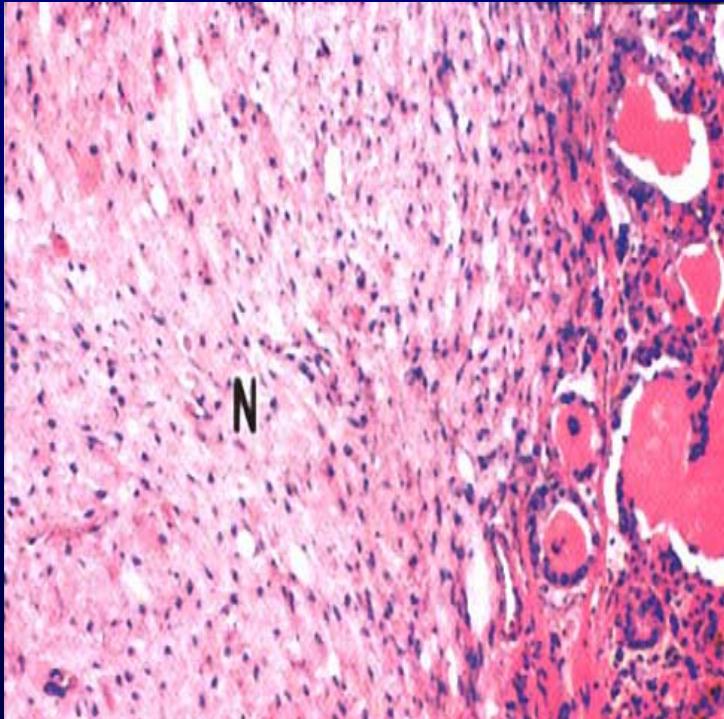

2 neurohypophysis

(1) unmyelinated never fibers: Herring body

supraoptic nucleus: ADH VP

paraventricular nucleus: oxytocin (OT)

(2) glial cell:
pituicyte

V pineal body

pinealocyte、 glial cells and unmyelinated
never fibers

Function: to produce melation

VI amine precursor uptake and

Decarboxylation cell (APUD cell)
